

Product Brief

FastCollect for Workplace Analytics

Completely Automated

Regulatory Compliance

User-Based Pricing

Realize the Full Benefits of Workplace Analytics

Understanding high-level patterns derived from analyzing email usage and calendaring metadata can provide businesses the information they need to drive more effective strategies for sales, marketing, employee engagement, and productivity.

Microsoft's Workplace Analytics (WpA) for Office 365 provides organizations a way to review and align current workplace processes more closely with their chosen business strategy and goals by creating additional value from their existing Office 365 investments.

The FastCollect for Workplace Analytics solution enables companies to realize the full benefits of Office 365 Workplace Analytics by automatically collecting and securely moving metadata from their on premise Exchange server to Office 365 and Workplace Analytics for inclusion in the overall WpA analyses. Companies with hybrid email systems can generate a complete, holistic view of all email data including the data in your on premise Exchange servers.

Policy-Driven

- Create policies for on premise data collection and movement to Office 365 WpA
- Fully automatic data migration

Complete WpA Capability

- Enables full hybrid email system analytics
- Get the entire picture of your employee's productivity, workloads, and interactions

Legal/Regulatory Compliance

- Meets regulatory privacy requirements - your data remains in your Microsoft Cloud tenancy
- Data collection and migration is legally defensible

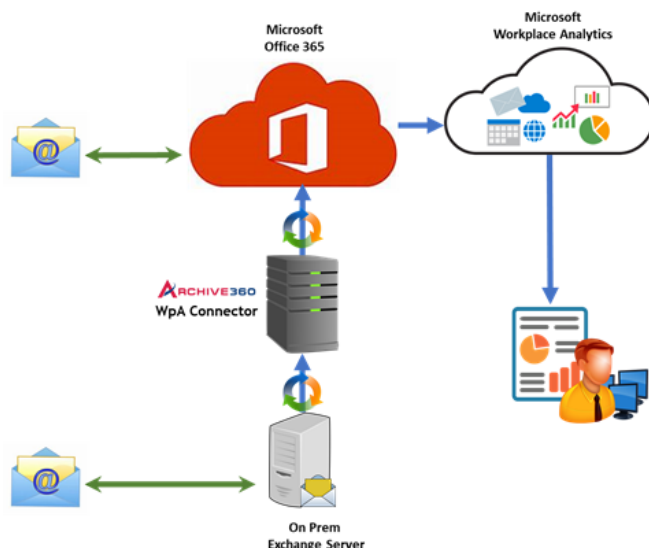

FastCollect for WpA enables you to:

- ✓ Create data collection and movement policies to take advantage of your network activity
- ✓ Migrate Exchange metadata to Office 365 WpA automatically
- ✓ Metadata securely migrated with data in transit encryption
- ✓ Digitally compare data before and after movement - digital fingerprinting

Many companies have hybrid email environments – email boxes in both Office 365 and Exchange on premise.

By combining data from both your on premise Exchange server(s) and your Office 365 instance, you are able to create all-inclusive views of your employees work activities, productivity, and their work environment.

FastCollect for Workplace Analytics works in the background collecting and moving Exchange server metadata to Office 365 and WpA in a completely secure manner - including data encryption of data in flight.

Get the complete picture of your employee communication productivity and interactions with FastCollect for Workplace Analytics

About Archive360

Archive360 is the world's leading provider of data migration and management solutions for the Microsoft cloud. Archive360's Archive2Azure solution is the industry's first compliance and information storage and management solution based on the Microsoft Azure platform. Archive360 is a global organization that delivers its solutions both directly and through a worldwide network of partners. Archive360 is a Microsoft Cloud Solution Provider and the Archive2Azure solution is Microsoft Azure Certified. To learn more, please visit: www.archive360.com
