### Migrating from SourceOne

The SourceOne on premise email archiving platform has been around for many years. However, as more organizations migrate their live Exchange email systems to Office 365, the question of what to do with your legacy SourceOne archive; preserve it and continue to incur the expense of keeping it operational, or migrate your SourceOne archive to Office 365.

Keeping your SourceOne archive operational is a costly and complex strategy. The benefits of migrating your SourceOne data to Office 365 include:

- ✓ Free archive folders
- ✓ Employee live email, and their archived emails are located in a single repository
- ✓ Provides a single repository to speed eDiscovery search
- Much lower cost

## **Product Highlights**

**FastCollect for Archives SourceOne Edition** is the leading email archive migration solution designed specifically to work with SourceOne. FastCollect is fully integrated with SourceOne data volumes for faster, more accurate, and legally defensible extractions. FastCollect extracts raw messages and attachments, including all metadata, directly from the SourceOne database. It maintains an item-level audit trail for compliance reporting, and preserves original message fidelity for eDiscovery and regulatory requests. Additional key features and benefits include:

- Messages are processed directly into your choice of targets with 99.99% accuracy.
- Faster, more accurate data extractions because it does not depend on the SourceOne API
- Full integration with SourceOne Ensures full legal defensibility
- Begin message extraction within minutes of installation Does not require indexing or data gathering before extraction
- Email shortcuts (or stubs) are automatically reconciled
- Full reconstitution of split, single instanced and compressed messages
- Message-level chain of custody audit and reporting for legal defensibility

### **Migration Options**

Migrate directly to:

- Microsoft Exchange
- ✓ Microsoft Office 365
- ✓ Microsoft Azure
- Additional 3rd party Archives

#### Multi-stream Data Processing

- ✓ PST target
- ✓ 7.2+ TB per day per server
- Exchange On-Premise
  5.0+ TB per day per server
- ✓ Office 365
- 2.5+ TB per day per server
- ✓ Gmail / Google Vault
- ✓ 600 GB per day per server (Google API throttle limit)

# DATA SHEET

## **Product Features and Benefits**

- Multi-threaded, multi-server platform Provides the highest performance and accuracy of all migration solutions
- No reliance on EMC SourceOne API Faster, more accurate data extractions
- Full integration with EMC SourceOne SQL DB and Data Volumes Ensures full legal defensibility
- Zero indexing or data gathering before extraction

Begin message extraction within minutes of installation unlike other solutions that take days or weeks to index before start

 Full reconstitution of split, single instanced and compressed messages
 Ensures a legally defensible ingestion into the target repository

- EMC SourceOne Outlook Shortcut (stubs)
  Management and reconciliation
  All stubs are found, reconciled, recombined,
  redirected or deleted with full documentation
  Reduces help desk calls and end-user issues
- No data conversions needed
  Migrated data can be represented as original in regulatory or legal situation
- Folder path and custom MAPI properties reconstruction

Provides valuable forensic data not available with other migration solutions

- Intuitive, powerful graphical user interface Less time needed for training – faster time to migration
- Message level chain of custody reporting Legally defensible reporting reduces eDiscovery risk

	Windows 2008 R2 Standard / Enterprise 64bit
	CPU: 16 cores
Application / Migration Server	RAM: 16 GB of RAM
	Application HDD: 40 GB
	Archive Disk Storage: Archive grade or better (SATA, SAN or NAS)
	Microsoft Outlook 2007 / 2010 / 2013 32-bit
Software Requirements	Microsoft .NET Framework 4.5 Click here
	Disable User Account Control (UAC)
	Microsoft SQL 2005 / 2008 Standard or Enterprise
	CPU: 16 cores
	RAM: 16 GB of RAM
Microsoft SQL Server	Disk Storage: Medium performance grade (SATA or SAN)
	NOTE: The FastCollect database can reside on the same SQL server where the
	email archive database resides. An alternate SQL server can also be used.
