Streamline Cloud Migrations with Automated File Discovery and Analysis

Many organizations start the migration process without first fully understanding the strategic business needs, regulatory requirements, or even the type, load or location of the information stored across their IT infrastructure.

With FastCollect for File Servers, you're able to quickly identify, analyze, and collect file share data,

including corporate records, presentations, audio and video files, scans and faxes, and legacy application data, and automatically migrate all this information to the cloud

Compliance Archive

- Support for unlimited data types
- Complies with SEC, GDPR, and MiFID II rules
- Immutable and auditable storage

Secure Data Access

- Granular user access controls and data encryption
- Native integration with Azure AD, Azure RMS, and SharePoint

Search & Analytics

- Configurable, indexable, scalable search
- Intelligent data analysis with Azure Cognitive Services, Media Services, and Machine Learning

FastCollect enables you to:

- ✓ Dramatically reduce storage volumes and speed up content backup and recovery
- ✓ Maintain data in its true, native format and never pay to migrate again
- ✓ Apply policy-based file collection rules using preselected criteria
- ✓ Speed legal response times and reduce your eDiscovery costs
- ✓ Native integration with SharePoint for end user self-service access
- ✓ Full support for legal administration

Image: Get a complete characterization of your current information archive and make informed decisions about your storage allocation and data to be migrated to the cloud.

About Archive360

Archive360 is the world's leading provider of data migration and management solutions for the Microsoft cloud. Since 2012, Archive360 has securely migrated data into the Microsoft cloud with record-breaking speed, verifiable data fidelity and legally defensible chain of custody.
